In the Claims

1. (Amended Three Times) A method for the treatment of a length of bagged material which comprises;

mounting an open end of a large flexible bag and a gathered portion of the bag onto a bag filling machine,

filling the bag through the open end with material to be stored and treated during storage, said bag when filled defining a bag exterior wall and said filling including the progressive deployment of the gathered portion of the bag,

during the bag filling process directing a continuous perforated conduit from a feed tube mounted on the machine and through the open end of the bag into the material contained in the bag and spaced inwardly from the bag exterior wall, and upon
